

Climate Bulletin

A Quarterly Newsletter from Ghana Climate Innovation Centre

[ABOUT GCIC](#)

We are delighted to share with you the latest edition of the GCIC newsletter, your source for insights and developments within the dynamic climate ecosystem.

In this edition, we shine a spotlight on one of our Cohort 7 businesses, Fiber Wealth Limited, a trailblazer pioneering the conversion of coconut waste into Cocopeat, and share with you our latest Policy Brief on the topic, Increasing Women's Participation in The Green Economy, developed in cooperation with IMANI Africa.

We also invite you to explore GCIC's newest climate-focused documentaries, highlighting the remarkable achievements of Mending Papers, an enterprise that turns post-harvest waste like plantain and banana stems, rice straws, and corn husk into eco-friendly alternatives to plastic packaging.

We hope you find this edition both informative and inspiring. Thank you for your continued support of GCIC and our mission to drive innovation and sustainability in Ghana's business landscape.
